

**COLORS, INC.**

## Quality

**Quality control begins** in our 24-hour laboratory, where every two hours our trained technicians carefully test each and every anodizing solution. This constant care keeps our anodizing error-free so that the process used at 8 a.m. will be the exact same process used at 8 p.m. and instead of using pre-mixed dyes, we custom mix every color, from Oil Rub Bronze to Kelly green, allowing our technicians to precisely match the color you've designated.

# **Industry Leader Since 1946**

# NOBODY KNOWS "COLORS" LIKE COLORS...

At Colors, we custom match our dyes to the sample you choose, allowing you to choose from any of these colors and more.

## Who is Colors, Inc.?

*Colors is a third-generation family owned* anodizing company located in Indianapolis, Indiana. We provide durable, long-lasting, and high-quality clear or color coatings on aluminum parts that will stand the test of time, much like our business.

*At Colors, we've built our reputation* on our ability to produce the brightest, most accurate colors in the anodizing industry. In fact, we're so confident in the superiority of our anodizing process, we'll run a single sample part 36 inches or less in size and in any color possible, absolutely free. That's just one of the many ways we back up our claim of being the industry leader since 1946.

## What We Can Do

*Capabilities at Colors Inc. include* sulfuric acid anodize in Bright up to 15' or Satin up to 16' which can be in most any color you desire. Also with some limitations include in our processes MIL-C-5541 and MIL-A-8625, Type II, Class I and II, AMS Specs (Excluding hard coat and chromic anodize). We have laser engraving, local sources for buffing and brushing as well as in house capabilities for hand brushing of flat panels.

## The Hand Line

*The Hand Line* can give your small parts the look and protection that will be a selling point to your customers.

**Standard Colors:** Gold (Good for exterior uses), black, blue, green, red, violet and bronze.

**Custom Colors:** We custom blend dyes to match your sample and can reference nationally known color charts.

**Finishes:** From the bright to satin.

**Sizes:** three feet in length or less.

**Lead Time:** Two weeks max.

## The Hoist Line

*The Hoist Line is capable of* anodizing long extrusions, heavy plates, high volume small parts or other manufactured aluminum products so that they are beautiful as well as protected.

**Standard Colors:** Gold (good for exterior uses) and Black.

**Custom Colors:** We custom blend dyes to match your sample and can reference nationally known color charts.

**Finishes:** From the bright to satin.

**Sizes:** 16 foot satin, 15 foot bright.

**Lead Time:** two weeks max.
